Introducing Digital Demand

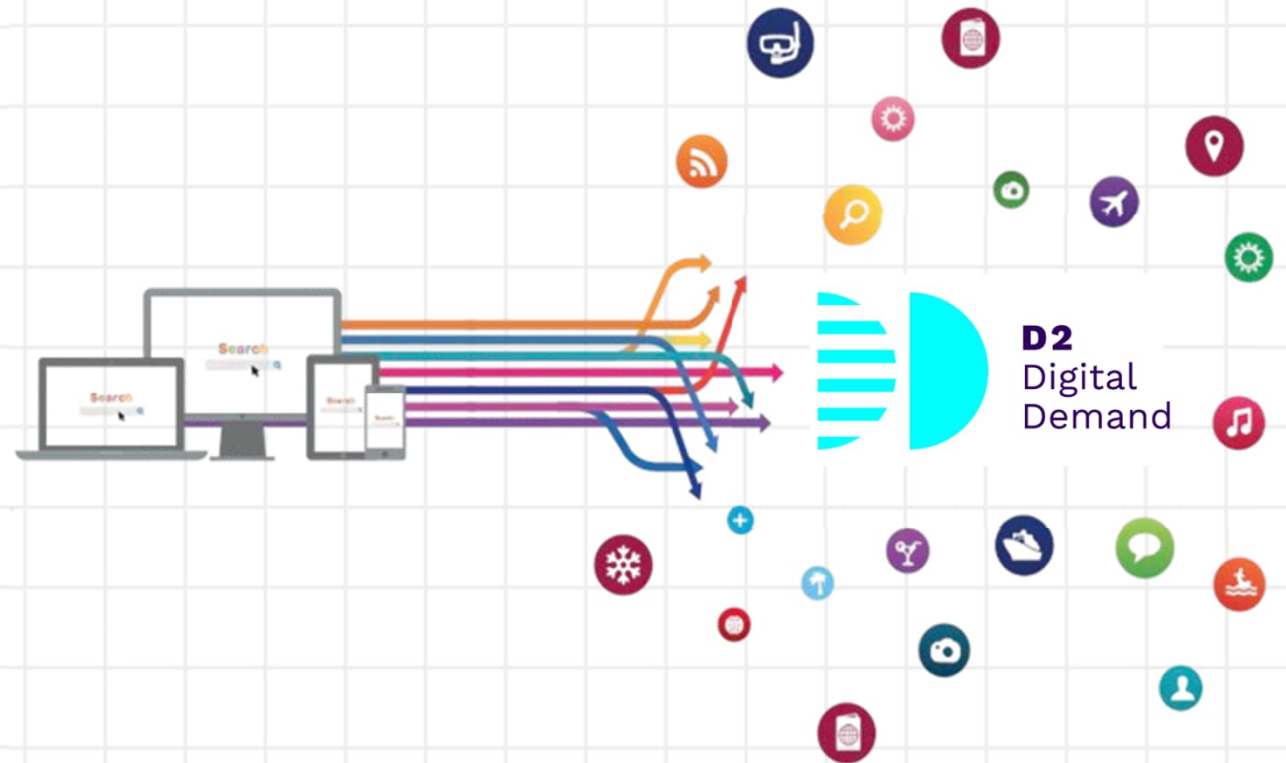

The data collected from the D2 - Digital Demand © tool provides an understanding of the international demand for a specific country, region, or city. This information is obtained from analyzing the specific keywords that global citizens use on the most popular search engines worldwide.

According to the ideology presented by D2 - Analytics, when someone searches for information about a country, region, or city, the search engine is one of the primary sources used today.

Researchers, travelers, investors, professionals, and others use search engine results to inform their decisions about the next steps in these areas.

Prior to analyzing the data in the D2 - Digital Demand © software, please consider that the nature of the results is mainly focused on the total searches performed online by global citizens.

Conclusions Q2 2024

1. Search volumes for Finland consistently exceed those of the previous year, replicating trend from 2022.
2. Top Micro-Brandtags remain steady, but they focus mainly on the generic and winter-related searches.
3. Saunas, Cities, and Lakes note a decrease in appeal while other themes continue to grow.
4. Top 4 Target Markets remain the same, but United States is moving to the lead position.
5. There is a shift in market behaviour, both for distant and regional markets.
6. The behavior of the Finnish market consistently surpasses last year's volume, showing a similar trend in search behavior.

Conclusions

Q3 2024 data refresh

Conclusion 1

Finland is one of the two countries to see an increase in search volume compared to the same period last year.

Finland, despite showing the highest growth rate at +11,2% and reaching 2,0 million searches, continues to rank last in the overall benchmark ranking but leads in growth rate.

Conclusion 2

August experiences strong growth in search volumes, continuing Finland's positive trend.

Search volume for Q3 2024 shows a notable increase compared to the same period in previous years. In July 2024, search volume grew by +15,2% compared to July 2023, and by +31,3% compared to July 2022. August 2024 saw an even stronger growth of +23,7% compared to August 2023, and +30,7% compared to August 2022. Similarly, September 2024 recorded a +19,9% increase over September 2023, and a +31,3% rise compared to September 2022.

Despite fluctuations in individual months, the general trend shows steady growth across all three years, with 2024 search volumes consistently higher.

Conclusion 7

The Finnish market experiences a decline in search volumes for the first time in years.

In Q3 2024, Finland recorded a decline in search volumes despite having higher figures in Q1 and Q2 compared to 2023. Although July saw a peak of 180K searches, August experienced a drop to only 124K searches, marking a decrease of 5,3% from 131K in August 2023. September also saw a decline, with searches falling to 113K, down from 117K in the same month last year, representing a decrease of 3,4%.

These numbers suggest that, while Finland had a strong start to the year, the overall demand has weakened in the third quarter.
